*Dream Quartet* - June Ballantyne 2021-09-24

I received four stories over a few months from dreams that came over a period of days and stayed in my mind until I wrote them down, and others via my subconscious. When I was sitting in my car at the beach and events happened that forced me to go home and sit at my computer, the stories came at great speed into my mind, and I typed them out and read them afterwards. The first is about a young girl who has moved to London for her new job working for the government. She meets a young gypsy who wants to tell her something. They have a connection, and events lead her to join him in the summer at the gypsy encampment, where she learns of her true family. Her life changes from there. The second story, again from a dream over a period of days, is a love story. A girl has a past that gets in the way. The third story I love. I was sitting in my car at the beach and words ran across the book I was trying to read. I drove home, and before I arrived at my door, the words were pushing their way into my head. I sat and typed as fast as my fingers could keep me going, and then it ended. I did not know what I wrote, so I read the story: an amusing

plan by six young adults to have a mystery holiday, while at the same time creating fun things for each of them to do while waiting for clues at their hotel, each one filled with mischief. It had an amusing twist for the ending. However, that night I had to get up and go to my computer and continue with a second part to the story. I really enjoyed it. The final story was very emotional for me. There was heartache, the mystery of where your soul goes after death, how life continues on a new path, and who is in charge.

*The Tetris Effect* - Dan Ackerman 2016-09-06  
The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of

Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

The Writer's Diet - Helen Sword 2016-05-02

Do your sentences sag? Could your paragraphs use a pick-me-up? If so, *The Writer's Diet* is for you! It's a short, sharp introduction to great writing that will help you energize your prose and boost your verbal fitness. Helen Sword dispenses with excessive explanations and overwrought analysis. Instead, she offers an easy-to-follow set of writing principles: use active verbs whenever possible; favor concrete language over vague abstractions; avoid long strings of prepositional phrases; employ adjectives and adverbs only when they contribute something new to the meaning of a sentence; and reduce your dependence on four pernicious "waste words": it, this, that, and there. Sword then shows the rules in action through examples from William Shakespeare, Emily Dickinson, Martin Luther King Jr., John McPhee, A. S. Byatt, Richard Dawkins, Alison Gopnik, and many more. A writing fitness test encourages you to assess your own writing and get immediate advice on addressing problem areas. While *The Writer's Diet* is as sleek and concise as the writing ideals contained within, this slim volume packs a powerful punch. With Sword's coaching writers of all levels can strengthen and tone their sentences with the stroke of a pen or the click of a mouse. As with any fitness routine, adhering to the rules requires energy and vigilance. The results,

however, will speak for themselves.

**An Introduction to the Archaeology of Central California** - Jeremiah Beverley Lillard 1939

**Learn to Invent** - S. E. Clark 2014-04-07

Every man should strive to be the architect of his own fortune. Although this work was originally published in the early 1900's, the wisdom and ideas are timeless. Invention is the fountain source of material progress. It would indeed be a fruitless effort to try to express in adequate language its wondrous possibilities and practical worth to mankind. Its field of action surpasses all others. It is most apparent in our daily walks of life. Every human effort owes it homage. The fame of many inventors has encircled the earth. They have been feted and honored in many ways, their names indelibly inscribed on the roll of the earth's greatest men. Fortune and fame have been showered on them with a lavish hand, and yet little or no effort is made to direct thought into this vast and unlimited field for study, that people may learn to invent. The whole subject is left quite in the dark. It is on the go-as-you-please, hit-and-miss plan. People become inventors by mere chance, and are viewed as possessing a special gift of nature. I hold that invention is just as tangible as any of the sciences and can just as well be taught. The human mind is naturally inventive. The trend will improve and grow or it will wilt and die, according to the attention it receives. To learn to invent we should apprentice ourselves, as it were, to the inventor, take up his invention and study the original lines of his thought, as the young artist studies the master

work.
