*LaserWriter II* - Tamara Shopsin 2021-10-19  
A WIRED Pick for the 7 Books You Need to Read This Winter and one of Vox's 11 Titles Not to Miss From the incomparable New York Times and New Yorker illustrator Tamara Shopsin, a debut novel about a NYC printer repair technician who comes of age alongside the Apple computer—featuring original artistic designs by the author. *LaserWriter II* is a coming-of-age tale set in the legendary 90s indie NYC Mac repair shop TekServe—a voyage back in time to when the internet was new, when New York City was gritty, and when Apple made off-beat computers for weirdos. Our guide is Claire, a 19-year-old who barely speaks to her bohemian co-workers, but knows when it's time to snap on an antistatic bracelet. Tamara Shopsin brings us a classically New York novel that couldn't feel more timely. Interweaving the history of digital technology with a tale both touchingly human and delightfully technical, Shopsin brings an idiosyncratic cast of characters to life with a light touch, a sharp eye, and an unmistakable voice. Filled with pixelated philosophy and lots of printers, *LaserWriter II* is, at its heart, a parable about an apple.

### **The Psychosocial Implications of Disney Movies** - Lauren Dundes 2019-07-11

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15

articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

**Living on the Spectrum** - Elizabeth Fein  
2020-07-07

How youth on the autism spectrum negotiate the contested meanings of neurodiversity Autism is a deeply contested condition. To some, it is a devastating invader, harming children and isolating them. To others, it is an asset and a distinctive aspect of an individual's identity. How do young people on the spectrum make sense of this conflict, in the context of their own developing identity? While most of the research on Asperger's and related autism conditions has been conducted with individuals or in settings in which people on the spectrum are in the minority, this book draws on two years of ethnographic work in communities that bring people with Asperger's and related conditions together. It can thus begin to explore a form of autistic culture, through attending to how those on the spectrum make sense of their conditions through shared social practices. Elizabeth Fein brings her many years of experience in both clinical psychology and psychological anthropology to analyze the connection between neuropsychological difference and culture. She argues that current medical models, which espouse a limited definition, are ill equipped to deal with the challenges of discussing autism-related conditions. Consequently, youths on the autism spectrum reach beyond medicine for their stories of difference and disorder, drawing instead on shared mythologies from popular culture and speculative fiction to conceptualize their experience of changing personhood. In moving and persuasive prose, *Living on the Spectrum* illustrates that young people use these stories to pioneer more inclusive understandings of what makes us who we are.

Feature Selection and Enhanced Krill Herd Algorithm for Text Document Clustering - Laith

Mohammad Qasim Abualigah 2018-12-18

This book puts forward a new method for solving the text document (TD) clustering problem, which is established in two main stages: (i) A new feature selection method based on a particle swarm optimization algorithm with a novel weighting scheme is proposed, as well as a detailed dimension reduction technique, in order to obtain a new subset of more informative features with low-dimensional space. This new subset is subsequently used to improve the performance of the text clustering (TC) algorithm and reduce its computation time. The k-mean clustering algorithm is used to evaluate the effectiveness of the obtained subsets. (ii) Four krill herd algorithms (KHAs), namely, the (a) basic KHA, (b) modified KHA, (c) hybrid KHA, and (d) multi-objective hybrid KHA, are proposed to solve the TC problem; each algorithm represents an incremental improvement on its predecessor. For the

evaluation process, seven benchmark text datasets are used with different characterizations and complexities. Text document (TD) clustering is a new trend in text mining in which the TDs are separated into several coherent clusters, where all documents in the same cluster are similar. The findings presented here confirm that the proposed methods and algorithms delivered the best results in comparison with other, similar methods to be found in the literature.

That's Not What I Heard! - Dennison G. Rice 2016-02-25

Its always about change, and the futility of depending on people and circumstances not to change. We take cold comfort in relying on maxims which insist that change can be controlled: over time, everything is supposed to get easier, it doesnt; small words are the easiest to understand, they never are; and hard work always pays off in the end, rarely. You may recall a time when you made a major decision, worked through a difference of opinion, or learned from others mistakes. These stories and plays are a catalog of people in transition, and a reminder that the questions in life never change, but the answers are always different.
