"A fascinating and frightening book" (Los Angeles Times)—the bestselling true story about a house possessed by evil spirits, haunted by psychic phenomena almost too terrible to describe. In December 1975, the Lutz family moved into their new home on suburban Long Island. George and Kathleen Lutz knew that, one year earlier, Ronald DeFeo had murdered his parents, brothers, and sisters in the house, but the property—complete with boathouse and swimming pool—and the price had been too good to pass up. Twenty-eight days later, the entire Lutz family fled in terror. This is the spellbinding, shocking true story that gripped the nation about an American dream that turned into a nightmare beyond imagining—"this book will scare the hell out of you" (Kansas City Star).

another's. The Pennsylvania Turnpike opened to traffic on October 1, 1940. Built using the right-of-way and unfinished tunnels of the never completed South Pennsylvania Railroad, it was a supreme achievement of civil engineering. The new highway immediately captured the public's imagination and proved to be an unqualified success. Motorists flocked from around the country to drive on the new superhighway, and it became a tourist destination on its lonesome. But along with that success, the seeds were planted for its eventual fall from grace. Under-engineered, poorly maintained, and the victim of premature obsolescence, the highway became the object of public scorn in little more than a generation. Only since the turn of the 21st century were real efforts made to change that perception.

Beyond The Fray: Bigfoot - Shannon Legro

"Be mindful of what lies beyond the wood line." It's argued that the recent search for Bigfoot officially began on September 21, 1958, when journalist, Andrew Genzoli of the Humboldt Times, featured a letter from a reader about loggers in Northern California concerning large footprints they'd found at a work site. What began as a fun article turned into an almost instant national sensation and since stories of the elusive creature have poured in, not just from California and the Pacific Northwest, but from around the world. **BEYOND THE FRAY: BIGFOOT** features some of these personal eyewitness accounts and terrifying encounters, most taken from the transcripts of the popular podcast, **iNTO THE FRAY**. These stories are unique and scary. They will leave you wondering what this creature is and will no doubt give you pause before you cross the wood line and enter the woods.

Wildwood Days - Francesca Wright 2006-03

Francesca Wright, pictured here in her Santa Fe home at the age of 95, was born into abject poverty, the youngest in a family of nine children, in the Ozark Hills of Missouri in 1911. Her mother and siblings farmed a small parcel of depleted land while her father sought supplementary income as a painter of both structures and canvases. As a child,

Francesca followed in her father's footsteps as he gathered bark and berries to mix for his paintings. Today, her acclaimed portraits and landscapes reside in prestigious art collections worldwide. Wildwood Days is the true story of Francesca's childhood. It is the story of her mother's tireless efforts to educate and empower her children in the face of grinding poverty, and of Francesca, at the age of twelve, finding herself left entirely alone for four long years--alone to manage her own survival as well as the crops, livestock and buildings of the family farm. In counterpoint to the genuine hardships, the myriad delightful characters and details which Francesca recalls--through the eyes of a child--make for a heartwarming, often quite funny, and altogether uplifting read. Francesca's tale ends with her fortuitous escape at age seventeen into a wider world, a new beginning to a long and distinguished career.

The Pennsylvania Turnpike -
Mitchell E. Dakelman
2004-06-16

The Pennsylvania Turnpike is one of the best-known highways in the United States. Most Pennsylvania Turnpike travelers are unaware that its construction was inspired by the route of the never completed South Pennsylvania Railroad. In the 1930s, men of great vision conceived, planned, and built the nation's first long-distance superhighway using the abandoned railroad's partially finished tunnels as its foundation. Originally predicted to be a financial

failure, the project was a tremendous success, and the turnpike came to be known as the World's Greatest Highway. Over the years, the Pennsylvania Turnpike was expanded and improved, laying the groundwork for the nation's Interstate Highway System. The Pennsylvania Turnpike draws from the extensive photograph collection in the Pennsylvania State Archives. Many were taken by photographers hired by both the Pennsylvania Turnpike Commission and its contractors, and most have never been published previously.

[Land of Necessity](#) - Alexis McCrossen 2009-06-19

Published in cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. In *Land of Necessity*, historians and anthropologists unravel the interplay of the national and transnational and of scarcity and abundance in the region split by the 1,969-mile boundary line dividing Mexico and the United States. This richly illustrated volume, with more than 100 images including maps, photographs, and advertisements, explores

the convergence of broad demographic, economic, political, cultural, and transnational developments resulting in various forms of consumer culture in the borderlands. Though its importance is uncontested, the role of necessity in consumer culture has rarely been explored. Indeed, it has been argued that where necessity reigns, consumer culture is anemic. This volume demonstrates otherwise. In doing so, it sheds new light on the history of the U.S.-Mexico borderlands, while also opening up similar terrain for scholarly inquiry into consumer culture. The volume opens with two chapters that detail the historical trajectories of consumer culture and the borderlands. In the subsequent chapters, contributors take up subjects including smuggling, tourist districts and resorts, purchasing power, and living standards. Others address home décor, housing, urban development, and commercial real estate, while still others consider the circulation of

cinematic images, contraband, used cars, and clothing. Several contributors discuss the movement of people across borders, within cities, and in retail spaces. In the two afterwords, scholars reflect on the U.S.-Mexico borderlands as a particular site of trade in labor, land, leisure, and commodities, while also musing about consumer culture as a place of complex political and economic negotiations. Through its focus on the borderlands, this volume

provides valuable insight into the historical and contemporary aspects of the big “isms” shaping modern life: capitalism, nationalism, transnationalism, globalism, and, without a doubt, consumerism.
