Developing Social Equity in Australian Adult Education - Pamela Osmond 2021-03-07

Developing Social Equity in Australian Adult Education: Lessons from the Past presents a case study of the trajectory of an Australian adult basic education program in New South Wales from its humanist, social justice beginnings, through forty years of destabilising change. It identifies the influences and influencers that have directed this change; those that were responsible for the creation of the field in its foundation years, and that were displaced by other, more powerful actors representing the global influence of the neoliberal ideology. The story is told largely through archival evidence and the voices of those practitioners who helped shape the discourse and practice of the foundation years, and who were required to respond to constantly changing policies and socio-economic contexts. It discusses some lessons that might be learnt from the past in order that a new set of actors might be mobilised to promote an alternate discourse. This book will appeal to students and scholars of social justice and adult education, and practitioners involved in adult education.

Icda - Andrew Zellgert 2021-12-15

Timmy was never meant to be a hero, but when Beezley Bub announces he is taking over the universe and plans to become the supreme ruler of everything, his plans change. Teaming up with a government organization that deals with intergalactic threats, Timmy finds himself meeting robots, soldiers, agents, undead armies, and assassins all with the hopes of catching Beezley Bub at his own game. Then his enemy attacks. "Why would this place be selling these?" asked Timmy. "I was hoping you could tell me that," said Agent Orange as he stepped around a corner. "Not you again," moaned Timmy. "Will you ever stop trying to assassinate me?" "Never!" shouted Agent Orange. "Not until you die and wrongs have been righted!" He cocked his gun again and aimed it at Timmy. "For the good of all, please let me do this." "I am not going to die today, thank you," said Timmy. With that, he bolted to the left into a passage guarded by towers of boxes on either side. Bethany chased after him. Orange fired more shots at them, but he kept missing. "Will he ever leave us alone?" shouted Timmy to Bethany. "I don't think he will," said Bethany. "Is there a reason he wants me dead so badly?" asked Timmy. "He seems to believe that my death is justified." "Yeah, that is strange," said Bethany as she dodged a bullet that raced past her. "I wonder why he hasn't used a homing rocket on us yet." "I am not sure," said Timmy. "He seems to care for you, though, so perhaps that is why." "Good point," said Bethany with a frown. Timmy dodged a bullet, and it was at this moment that they came out into the open. Orange opened fire, and the two agents had to run in complex directions to confuse Orange, which seemed to work even though Bethany was slightly faster than Timmy. At that moment, a loud explosion rocketed throughout the factory. Bethany chanced a glance, and the color drained from her face.

[Hadoop Beginner's Guide](#) - Garry Turkington 2013-02-22

Data is arriving faster than you can process it and the overall volumes keep growing at a rate that keeps you awake at night. Hadoop can help you tame the data beast. Effective use of Hadoop however requires a mixture of programming, design, and system administration skills. "Hadoop Beginner's Guide" removes the mystery from Hadoop, presenting Hadoop and related technologies with a focus on building working systems and getting the job done, using cloud services to do so when it makes sense. From basic concepts and initial setup through developing applications and keeping the system running as the data grows, the book gives the understanding needed to effectively use Hadoop to solve real world problems. Starting with the basics of installing and configuring Hadoop, the book explains how to develop applications, maintain the system, and how to use additional products to integrate with other systems. While learning different ways to develop applications to run on Hadoop the book also covers tools such as Hive, Sqoop, and Flume that show how Hadoop can be integrated with relational databases and log collection. In addition to examples on Hadoop clusters on Ubuntu uses of cloud services such as Amazon, EC2 and Elastic MapReduce are covered.

[Prince2 Foundation Training Manual](#) - Van Haren Publishing 2017-01-15

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

Raw Materials Supply Chain for Rubber Products - John S. Dick 2014-06-30

The rubber industry is a vital part of the world economy. In this age of constantly changing economics and raw material "shortages of the week," this book should help the reader understand the overall technical and economic problems that are emerging which are beginning to affect the overall availability of many raw materials, chemical intermediates and final rubber products on the world scene. This book is truly unique in that it is the only one that traces all the important organic and inorganic synthesis routes for the manufacture of synthetic rubbers, various fillers, plasticizers, oils, curatives, antidegradants, adhesion promoters, flame retardants, tackifiers, and blowing agents through their respective intermediates to the base raw materials from earth extractions and agriculture.

[Learning with Information Systems](#) - Simon Bell 2013-02-01

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

The Ethos of the Climate Event - Kellan Anfinson 2020-12-30

This book develops a politico-ethical response to climate change that accounts for the novelty and uncertainty that it entails. This volume explores the ethical dimensions of climate change and posits that one must view it as a social construction intimately tied to political issues in order to understand and overcome this environmental challenge. To show how this ethos builds upon the need for new forms of responsiveness, Anfinson analyzes it in terms of four features: commitment, worldly sensitivity, political disposition, and practice. Each of these features is developed by putting four thinkers - Kierkegaard, Nietzsche, Schmitt, and Foucault respectively - in conversation with the literature on climate change. In doing so, this book shows how social habits and norms can be transformed through subjective thought and behavior in the context of a global environmental crisis. Presenting a multidisciplinary engagement with the politics, philosophy, and science of climate change, this book will be of great interest to students and scholars of climate change, environmental politics, environmental philosophy and environmental humanities.
