The Mark - Edyth Bulbring
2016-12-16

Sarah Lotz, internationally acclaimed author of *The Three*, and *Day Four*, describes *The Mark* as: "An entrancing, truly original novel packed with twists you won't see coming and a heroine that breaks the mould. Unputdownable." In the future, the world has flipped. Ravaged by the Conflagration, the State of Mangeria is a

harsh place where the sun beats down, people's lives are run by a heartless elite and law is brutally enforced. A mark at the base of the spine controls each person's destiny. The Machine decides what work you will do and who your life partner will be. Juliet Seven - "Ettie" - will soon turn 15 and her life as a drudge will begin, her fate-mate mate will be chosen. Like everyone else, her

future is marked by the numbers on her spine. But Ettie decides to challenge her destiny. And in so doing, she fulfills the prophecy that was spoken of before she even existed.

Among the Truthers - Jonathan Kay 2011-05-17

From 9/11 conspiracy theorists and UFO obsessives to the cult of Ayn Rand and Birther crusaders, America is suffering from an explosion in post-rationalist ideological movements. In Among the Truthers, journalist Jonathan Kay offers a thoughtful and sobering look at how social networking and Web-based video sharing have engendered a flourishing of new conspiracism. Kay details the sociological profiles of ten brands of modern conspiracists—the Failed Historian, the Mid-Life Crack-Up, the Damaged Survivor, the Campus Revolutionary, the Stoner, the Clinical Case, the Puzzle Solver, the Christian Doomsayer, the Cosmic Voyager, and the Egomaniac—in a compelling

exploration of America's departure from reason and what it means for the very future of rational discourse as the nation steps further into the 21st century.

The Maputo Development Corridor - Taylor & Francis Group

Jessica - Kevin Henkes 1998-05-27

"There is no Jessica," said Ruthie's parents. But of course there was. She ate with Ruthie, played with Ruthie, and was sorry when Ruthie was bad. Nobody could see Jessica -- except Ruthie. When it came time for Ruthie to go to school, Jessica went with her. Her parents hoped Ruthie would find a friend at school who would replace Jessica. They were in for a (happy) surprise!

[The Wonderful Spirit-Filled Life](#) - Charles F. Stanley
1995-09-06

Life abundant? Jesus promised it and we long for it, yet few Christians seem to have it. Blending lively anecdotes, commentary, and teachings from the Bible, Dr. Charles Stanley introduces you to the Holy Spirit. "A big part of the Spirit-filled life is learning to recognize the fingerprint of the Holy Spirit. Once you know what to look for and once you begin looking for it, you will be amazed at how real the Holy Spirit will become to you. Learning to recognize the Holy Spirit is the first step in learning to live the Spirit-filled life."

Nutrition and Vulnerable Groups - Amanda Devine
2019-06-17

Food insecurity is a complex 'wicked' problem that results from a range of unstable and uncertain physical, social,

cultural and economic factors that limits access to nutritious food. Globally, 800 million people are under-nourished, and around 2 billion are overweight/obese or have micronutrient deficiency. These populations are largely positioned in developing countries where disease burden is high and impacts health budgets and productivity. Similarly developed countries, cities and neighbourhoods are experiencing a greater emergence of vulnerable populations. This is in part explained by the change in the food production and manufacturing, the retraction in economic climates, the increase in food price, and in some regions reduced food availability and access. Vulnerable groups include but are not limited to migrant populations, Indigenous people, elderly, pregnant women, those with disability, homeless, young children and youth. Poor nutrition at significant periods of growth and development and

This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that

module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

An African Elegy - Ben Okri 2015-04-30

Dreams are the currency of Okri's writing, particularly in this first book of poems, An African Elegy, but also in his books of short stories and prize-winning novel The Famished Road. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an

exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, Times Literary Supplement

John Doorley 2011-04-06

Reputation management is the most important theme in public relations and corporate communication today. John Doorley and Helio Fred Garcia argue that most CEOs don't actually pay much heed to reputation and this is to their peril. This book is a how-to guide for professionals and students in public relations and corporate communication, as well as for CEOs and other leaders. It rests on the premise that reputation can be measured, monitored, and managed. Organized by corporate communication units (media relations, employee communication, government relations, and investor relations, for example), the book provides a field-tested guide to corporate reputation problems such as leaked memos, unfair treatment by the press, and negative rumors – and it is this rare book that focuses on practical solutions. Each chapter is fleshed out with real-world experience by the authors and their contributors who come from a

wide range of professional corporate communication backgrounds. This new edition features new and updated examples throughout, two new chapters on social media and public relations consulting, a new textbox feature in each chapter relating key communication theories to the practice of public relations and corporate communication, expanded coverage of global issues, and a new Companion Website at:

www.routledge.com/textbooks/doorley, featuring lecture materials for instructors and extensive learning resources for students and professionals.

Efficient Learning for the Poor
- Helen Abadzi 2006

"Large-scale efforts have been made since the 1990s to ensure that all children of the world go to school. But mere enrollment is not sufficient, students must become fluent in reading and calculation by the end of grade 2. Fluency is needed to process large amounts of text quickly and use the information for decisions that may ultimately reduce poverty. State-of-the-art

brain imaging and cognitive psychology research can help formulate effective policies for improving the basic skills of low-income students. This book integrates research into applications that extend from preschool brain development to the memory of adult educators. In layman's terms, it provides explanations and answers to questions such as: Why do children have to read fast before they can understand what they read? How do health, nutrition, and stimulation influence brain development? Why should students learn basic skills in their maternal language? Is there such a thing as an untrained teacher? What signs in a classroom show whether students are getting a quality education? How must information be presented in class so that students can retain it and use it? What training techniques are most likely to help staff put their learning into use? This book would be useful to policymakers, donor agency staff, teacher trainers,

supervisors, and inspectors, as well as university professors and students."

[The Multilingual Origins of Standard English](#) - Laura Wright 2020-09-07

Textbooks inform readers that the precursor of Standard English was supposedly an East or Central Midlands variety which became adopted in London; that monolingual fifteenth century English manuscripts fall into internally-cohesive Types; and that the fourth Type, dating after 1435 and labelled 'Chancery Standard', provided the mechanism by which this supposedly Midlands variety spread out from London. This set of explanations is challenged by taking a multilingual perspective, examining Anglo-Norman French, Medieval Latin and mixed-language contexts as well as monolingual English ones. By analysing local and legal documents, mercantile accounts, personal letters and journals, medical and religious prose, multiply-copied works, and the output of individual

scribes, standardisation is shown to have been preceded by supralocalisation rather than imposed top-down as a single entity by governmental authority. Linguistic features examined include syntax, morphology, vocabulary, spelling, letter-graphs, abbreviations and suspensions, social context and discourse norms, pragmatics, registers, text-types, communities of practice social networks, and the multilingual backdrop, which was influenced by shifting socioeconomic trends. *Western Ways* - Frederick Whitling 2018-12-03

In *Western Ways*, for the first time, the "foreign schools" in Rome and Athens, institutions dealing primarily with classical archaeology and art history, are discussed in historical terms as vehicles and figureheads of national scholarship. By emphasising the agency and role of individuals in relation to structures and tradition, the book shows how much may be gained by examining science and politics as two sides of the

same coin. It sheds light on the scholarly organisation of foreign schools, and through them, on the organisation of classical archaeology and classical studies around the Mediterranean. With its breadth and depth of archival resources, *Western Ways* offers new perspectives on funding, national prestige and international collaboration in the world of scholarship, and places the foreign schools in a framework of nineteenth and twentieth century Italian and Greek history.

Deep Learning and Linguistic Representation - Shalom Lappin 2021-04-27

The application of deep learning methods to problems in natural language processing has generated significant progress across a wide range of natural language processing tasks. For some of these applications, deep learning models now approach or surpass human performance. While the success of this approach has transformed the engineering methods of machine learning in artificial intelligence, the significance of these achievements for the modelling of human learning and representation remains unclear. Deep Learning and Linguistic Representation looks at the application of a variety of deep learning systems to several cognitively interesting NLP tasks. It also considers the

extent to which this work illuminates our understanding of the way in which humans acquire and represent linguistic knowledge. Key Features: combines an introduction to deep learning in AI and NLP with current research on Deep Neural Networks in computational linguistics. is self-contained and suitable for teaching in computer science, AI, and cognitive science courses; it does not assume extensive technical training in these areas. provides a compact guide to work on state of the art systems that are producing a revolution across a range of difficult natural language tasks.
