Voracious - Cara Nicoletti 2015-08-18

AN IRRESISTIBLE LITERARY FEAST Stories and recipes inspired by the world's great books As a young bookworm reading in her grandfather's butcher shop, Cara Nicoletti saw how books and food bring people to life. Now a butcher, cook, and talented writer, she serves up stories and recipes inspired by beloved books and the food that gives their characters depth and personality. From the breakfast sausage in Laura Ingalls Wilder's Little House in the Big Woods to chocolate cupcakes with peppermint buttercream from Jonathan Franzen's The Corrections, these books and the tasty treats in them put her on the road to happiness. Cooking through the books that changed her life, Nicoletti shares fifty recipes, including: The perfect soft-boiled egg in Jane Austen's Emma Grilled peaches with homemade ricotta in tribute to Joan Didion's "Goodbye to All That" New England clam chowder inspired by Herman Melville's Moby-Dick Fava bean and chicken liver mousse crostini (with a nice Chianti) after Thomas Harris's The Silence of the Lambs Brown butter crêpes from Gillian Flynn's Gone Girl Beautifully illustrated, clever, and full of heart, Voracious will satisfy anyone who loves a fantastic meal with family and friends-or curling up with a great novel for dessert.

Smart Things - Mike Kuniavsky 2010-09-14

The world of smart shoes, appliances, and phones is already here, but the practice of user experience (UX) design for ubiquitous computing is still relatively new. Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction, device design and service design -- which are all the key components of ubiquitous computing UX -- and practicing designers need a way to tackle practical challenges of design. Theory is not enough for them -- luckily the industry is now mature enough to have tried and tested best practices and case studies from the field. Smart Things presents a problem-solving approach to addressing designers' needs and concentrates on process, rather than technological detail, to keep from being quickly outdated. It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment. Divided into two sections, frameworks and techniques, the book discusses broad design methods and case studies that reflect key aspects of these approaches. The book then presents a set of techniques highly valuable to a practicing designer. It is intentionally not a comprehensive tutorial of user-centered design'as that is covered in many other books'but it is a handful of techniques useful when designing ubiquitous computing user experiences. In short, Smart Things gives its readers both the "why" of this kind of design and the "how," in well-defined chunks. Tackles design of products in the post-Web world where computers no longer have to be monolithic, expensive general-purpose devices Features broad frameworks and processes, practical advice to help approach specifics, and techniques for the unique design challenges Presents case studies that describe, in detail, how others have solved problems, managed trade-offs, and met successes

Built to Love - Peter Boatwright 2010-09-13

Boatwright and Cagan show how a firm can create products that electrify the market with excitement, products that go beyond functional performance to provide emotional fulfillment. There is a hum in the marketplace about these products, because they are the topic of conversations, media discussions, and social media posts. This book reveals how to understand, design and deliver products that engage and excite their customers through emotions evoked by the product itself, not just through advertising slogans and campaigns.

The Refrigerator Monologues - Catherynne M. Valente 2017-06-06

From the New York Times bestselling author Catherynne Valente comes a ferocious riff on the women in superhero comics. The Refrigerator Monologues is a collection of linked stories from the points of view of the wives and girlfriends of superheroes, female heroes, and anyone who's ever been "refrigerated": comic book women who are killed, raped, brainwashed, driven mad, disabled, or had their powers taken so that a male superhero's storyline will progress. In an entirely new and original superhero universe, Valente subversively explores these ideas and themes in the superhero genre, treating them with the same love, gravity, and humor as her fairy tales. After all, superheroes are our new fairy tales and these six women have their own stories to share.

Environmental Information in Instructions for Use of Consumer Products - Ari Nissinen 2005-03-11

The European Union has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy, IPP. Accordingly, consumers should have easy access to understandable, relevant and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on, examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and 'eco-development' of instructions for use.

The Future of Competitive Strategy - Mohan Subramaniam 2022-08-16

How legacy firms can combine their traditional strengths with the power of data and digital ecosystems to forge a new competitive strategy for the digital era. How can legacy firms remain relevant in the digital era? In *The Future of Competitive Strategy*, strategic management expert Mohan Subramaniam explains how firms can leverage both their traditional strengths and the modern-day power of data and digital ecosystems to forge a new competitive strategy. Drawing on the experiences of a range of companies, including Caterpillar, Sleep Number, and Whirlpool, he explains how firms can benefit from data's enlarged

role in modern business, develop digital ecosystems tailored to their unique business needs, and use new frameworks to harness the power of data for competitive advantage. Subramaniam presents digital ecosystems as a combination of production and consumption ecosystems, which can be used by legacy firms to unlock the value of data at various levels—from improving operational efficiencies to creating new data-driven services and transforming traditional products into digital platforms. He explores the ways sensors and the Internet of Things provide new kinds of customer data; presents the concept of digital competitors—other firms that have access to similar data; discusses the new digital capabilities that firms need to develop; and addresses privacy and security issues associated with data sharing. Who needs this book? Any firm that wants to revitalize traditional business models, offer a richer customer experience, and expand its competitive arena into new digital ecosystems.
