how to find the equation of a perpendicular line act math

explanation the slope of m is equal to $y_2 - y_1$ $x_2 - x_1$ 2 4 5 1 1 2 since line p is perpendicular to line m this means that the products of the slopes of p and m must be 1 slope of p 1 2 1 slope of p 2 so we must choose the equation that has a slope of 2 if we rewrite the equations in point slope form $y - mx = b$ we see that the equation $2x - y = 3$

psat practice tests varsity tutors

our completely free psat practice tests are the perfect way to brush up your skills take one of our many psat practice tests for a run through of commonly asked questions you will receive incredibly detailed scoring results at the end of your psat practice test to help you identify your strengths and weaknesses
