Waste - Catherine Coleman Flowers 2020-11-17

The MacArthur grant-winning environmental justice activist's riveting memoir of a life fighting for a cleaner future for America's most

vulnerable A Smithsonian Magazine Top Ten Best Science Book of 2020 Catherine Coleman Flowers, a 2020 MacArthur “genius,” grew up in Lowndes County, Alabama, a place that’s been called “Bloody Lowndes” because of its violent, racist history. Once the epicenter of the voting rights struggle, today it’s Ground Zero for a new movement that is also Flowers’s life’s work—a fight to ensure human dignity through a right most Americans take for granted: basic sanitation. Too many people, especially the rural poor, lack an affordable means of disposing cleanly of the waste from their toilets and, as a consequence, live amid filth. Flowers calls this America’s dirty secret. In this “powerful and moving book” (Booklist), she tells the story of systemic class, racial, and geographic prejudice that foster Third World conditions not just in Alabama, but across America, in Appalachia, Central California, coastal Florida, Alaska, the urban Midwest, and on Native American reservations in the West. In this inspiring story of the evolution of an activist, from country girl to student civil rights organizer to environmental justice champion at Bryan Stevenson’s Equal Justice Initiative, Flowers shows how sanitation is becoming too big a problem to ignore as climate change brings sewage to more backyards—not only those of poor minorities.

Knee Surgery - Daniel Fulham O'Neill 2008-12-09

Millions of people have knee surgery each year, and in the years to come millions more will head to the O.R. Chances are, you or someone you know has had or will undergo knee surgery. Busy doctors, therapists, and athletic trainers have limited time to spend on quality physical and mental rehabilitation education, yet this is the key to full recovery. Written by renowned knee surgeon and Sport Psychologist Daniel F. O'Neill, M.D., Ed.D., this comprehensive and accessible guide presents what you'll want and need the most after knee surgery: a scientifically-based recovery program you can understand that will get you back to work and sports as quickly as possible. In this age of same-day surgery and do-it-yourself health, KNEE SURGERY presents an easy-to-do, well-illustrated program of movement for knee rehabilitation - with a special focus on the mind/body connection - and describes the physical and mental rehabilitation process in complete detail, providing all the guidance you need to decrease pain and increase fitness after knee surgery.

Cellophane House - Stephen Kieran 2011

CELLOPHANE HOUSE(tm) chronicles the design and execution of a five-story, off-site fabricated home assembled on-site in just sixteen days as part of The Museum of Modern Art exhibition, Home Delivery:

Fabricating the Modern Dwelling. Through a series of questions, the book explores several of KieranTimberlake's ongoing research agendas including speed of on-site assembly, design for disassembly, a holistic approach to the life cycle of materials, and the development of a lightweight, high-performance, energy gathering building envelope.

Cellophane House(tm) takes a holistic approach to factory fabrication, reinventing the way a building is assembled, its materials, and spatial experience. An innovative aluminum frame enables mass-customization of the home in multiple configurations, rapid assembly, and adaptability to different sites and climates. Disassembly, rather than demolition, is inherent as an end-of-life option to successfully preserve the embodied energy in the recyclable house materials. More than a building experiment, it suggests a new way forward in an approach to mass housing. Cellophane House(tm) has received awards from several groups: the AIA Housing Committee, the AIA Technology Committee, Boston Society of Architects, the Chicago Athenaeum Museum of Architecture and Design, AIA Philadelphia and AIA Pennsylvania Chapters.

Hoosiers and the American Story - Madison, James H. 2014-10-01

A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

VW Golf, GTI, Jetta and Cabrio, 1999 Thru 2002 - Jay Storer 2003-01

It's a Long Way from Llano - James G. Teer 2008-09-01

Wildlife management around the world has changed drastically in the last fifty years, and veteran biologist James G. Teer was a trailblazer for much of that time. In this memoir, he looks back on his life and on the transformation of his profession. A pioneer in managing land for deer, Teer became truly global in his conservation efforts. From studying waterfowl in Manitoba and monitoring deer herds in the Texas Hill Country, Teer was propelled into the world of big ranches and African safaris, working for and traveling with Texas landowners while helping to build the reputation of the wildlife ecology program at Texas A&M University. As he reminisces, Teer gives homage to the men who mentored and taught him and to those whose friendships lasted a lifetime. He salutes his colleagues and his students, and he confirms his lifelong commitment to the care and stewardship of animals everywhere.

Fatherlands - Abigail Green 2001-09-06

An exploration of the nature of identity in nineteenth-century Germany.

Sweet Freedom's Plains - Shirley Ann Wilson Moore 2016-10-20

The westward migration of nearly half a million Americans in the mid-nineteenth century looms large in U.S. history. Classic images of rugged Euro-Americans traversing the plains in their prairie schooners still stir the popular imagination. But this traditional narrative, no matter how alluring, falls short of the actual—and far more complex—reality of the overland trails. Among the diverse peoples who converged on the western frontier were African American pioneers—men, women, and children. Whether enslaved or free, they too were involved in this transformative movement. Sweet Freedom's Plains is a powerful retelling of the migration story from their perspective. Tracing the journeys of black overlanders who traveled the Mormon, California, Oregon, and other trails, Shirley Ann Wilson Moore describes in vivid detail what they left behind, what they encountered along the way, and what they expected to find in their new, western homes. She argues that African Americans understood advancement and prosperity in ways unique to their situation as an enslaved and racially persecuted people, even as they shared many of the same hopes and dreams held by their white contemporaries. For African Americans, the journey westward marked the beginning of liberation and transformation. At the same time, black emigrants' aspirations often came into sharp conflict with real-world conditions in the West. Although many scholars have focused on African Americans who settled in the urban West, their early trailblazing voyages into the Oregon Country, Utah Territory, New Mexico Territory, and California deserve greater attention. Having combed censuses, maps, government documents, and white overlanders' diaries, along with the few accounts written by black overlanders or passed down orally to their living descendants, Moore gives voice to the countless, mostly anonymous black men and women who trekked the plains and mountains. Sweet Freedom's Plains places African American overlanders where they belong—at the center of the western migration narrative. Their experiences and perspectives enhance our understanding of this

formative period in American history.

Auto Repair For Dummies - Deanna Sclar 2019-01-07

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Global Trends 2030 - National Intelligence Council (U.S.) 2012

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

The House That Jack Built - Hal Jackson 2001-03-20

The House That Jack Built is the life story of Hal Jackson, one of the most important figures in American radio and television. When starting out as a young professional, during the Jim Crow era in Washington, D.C., Jackson was told by the management of WINX that no Black man would ever broadcast at their station. He ultimately proved them wrong and was given a time slot of the station -- thus beginning a long and illustrious career, filled with an extraordinary series of firsts: The first Black radio announcer on network radio. The first Black inducted in the Radio Hall of Fame. The first Black host of a jazz show on the ABC network. The first Black to do play-by-play sports announcing on radio. The first Black to host an interracial network show on NBC-TV. The first person to broadcast from a theater live. He organized and was one of the owners of the first Black team to win the World's Basketball Championship. The first Black host of an international network television presentation. He was instrumental in acquiring the first radio station owned and operated by Blacks in New York City. At a time when Black women were prohibited from entering beauty pageants, he founded Hal Jackson's Talented Teen International contest. Here is a remarkable story about a remarkable person. The House That Jack Built is an important addition to the history of media in the United States.

Switching Gears - Dan K. Eberhart 2020-10-13

The world is on the precipice of energy innovation. As we strive toward cleaner fuels, some technologies will rise and others will fall. Will the Tesla Roadster and the Nissan Leaf go the way of the 1890s' Morrison Electric? The new rock stars of the transportation industry are radical entrepreneurs with visions that may change the landscape of energy as drastically as computers changed the landscape of communication. Electric vehicles (EVs) are steadily gaining acceptance. Countries like Norway, France, India, and China have stated that they will abandon sales and manufacturing of conventional vehicles by 2025-2030 in favor of EVs. Eberhart's expert book provides everything we need to know to engage in the debate over EVs versus internal combustion vehicles. He

skillfully sorts fact from fiction, puts valuable research at our finger tips, and offers us a glimpse of what the world might look like in 2050 with a potential worldwide population of 9.6 billion people and over 530 million EVs on our roads. The future has never seemed more like science fiction. We've seen hydrogen fuel-cell-powered trains ("hyd rail"), autonomous drones, the first prototypes and working models of electric jets, and vertical takeoff and landing (VTOL) vehicles. Uber promised to lift intercity EVs to the sky with its Elevate program, and smaller startups have demonstrated ingenious contraptions for human-powered flight. Eberhart envisions a successful energy revolution where we learn from our mistakes and solve our puzzles, as we work toward a future that allows us to be conscientious, powerful, and energy-savvy all at the same time. Are EVs really the holy grail of energy solutions—power without fossil fuel? Are EVs here to stay?
